Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: applicant's arguments are deemed persuasive and furthermore, the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 10.

Specifically regarding claim 1, Crossland et al. (6654156) teaches the state of the art of a lens system.

But, Crossland et al. fails to explicitly teach a combination of all the claimed features including the lens system comprising a double gauss lens set having a distortion of less than about 0.015% with at least about 90% of the light energy of a specific pixel projected within a 15.4 micrometer square, as claimed.

Specifically regarding claim 10, Crossland et al. (6654156) teaches the state of the art of a lens system.

But, Crossland et al. fails to explicitly teach a combination of all the claimed features including a lens set consisting of one pair of equivalent achromatic lenses and one pair of symmetrical aspherical lenses positioned and configured to project the light

from a particular pixel on a first imager onto a corresponding pixel on a second imager, as claimed.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
